📍 New Delhi, India | ✉️ saadh3416@gmail.com | 🔗 [LinkedIn](#) | 🐙 [GitHub](#) | 🌐 [Portfolio](#) | ☎️ +91 8287356874

PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in Cybersecurity, Network Security, and Secure Software Development. Hands-on experience with Python, Linux, networking, vulnerability assessment, and Identity & Access Management (IAM), complemented by research in AI Security and Wireless IoT Security. Passionate about advancing cyber defense, cloud security, and secure intelligent systems through graduate research in Cybersecurity.

PROFESSIONAL EXPERIENCE

Green Park Real Estate LLC

Jan. 2026 – Present

Cybersecurity Specialist

Dubai, UAE

- Implemented cybersecurity best practices across 10+ internal business applications by strengthening authentication, authorization, and secure access control mechanisms.
- Performed vulnerability assessments and security reviews for 20+ business workflows, identifying security gaps and recommending remediation strategies that reduced potential risks by approximately 35%.
- Configured Role-Based Access Control (RBAC) and Identity & Access Management (IAM) policies for 100+ user accounts, improving access governance and enforcing least-privilege principles.
- Secured 15+ REST API integrations by implementing authentication controls, validating data exchange, and protecting confidential business information during application communication.
- Collaborated with software developers to integrate secure coding practices, reducing recurring security issues and improving application reliability throughout the software development lifecycle.
- Monitored security logs and system activities across business applications, assisting in identifying suspicious events and improving operational security response efficiency by 30%.
- Prepared 25+ cybersecurity documents including security policies, risk assessments, compliance reports, and standard operating procedures supporting secure organizational operations.
- Conducted cybersecurity awareness sessions for 30+ employees covering phishing prevention, password security, and data protection, improving overall security awareness across departments.

Stepping Cloud Consulting Private Limited

Oct. 2025 – Jan. 2026

Backend & AI Developer

Delhi, India

- Developed AI-powered automation solutions using Python, reducing manual lead generation effort by over 80% through intelligent workflow automation.
- Built automated lead scraping pipelines integrating multiple online sources, processing more than 10,000 business records with improved accuracy and scalability.
- Designed secure REST APIs and backend services supporting AI-powered applications while ensuring reliable communication and efficient data processing across platforms.
- Implemented authentication, API validation, and secure coding practices, improving backend application security and reducing common integration errors by approximately 40%.
- Developed CRM automation workflows that reduced lead qualification time by nearly 60% while improving sales process efficiency and customer engagement.
- Integrated third-party APIs and cloud services supporting automated business workflows, improving application reliability and reducing manual intervention during operations.
- Built analytics dashboards and automated reporting solutions that reduced report preparation time by over 50% and improved business decision-making.
- Collaborated with cross-functional teams to optimize AI workflows, improve backend performance, and deliver scalable software solutions within project timelines.

Jamia Hamdard University

Aug. 2025 – Sep. 2025

Research Intern – Privacy, AGI, and Cybersecurity for Wireless IoT Systems

New Delhi, India

- Conducted research on privacy-preserving artificial intelligence techniques for securing Wireless IoT communication systems against emerging cybersecurity threats.
- Investigated 15+ cybersecurity attack vectors, threat modeling methodologies, and secure communication protocols designed for Wireless IoT environments.
- Explored authentication mechanisms, secure network architectures, and privacy-preserving communication techniques supporting next-generation intelligent IoT infrastructures.
- Developed federated learning and machine learning models for intrusion detection and anomaly detection, improving intelligent threat identification accuracy during experiments.
- Evaluated differential privacy, secure aggregation, and privacy-enhancing technologies for trustworthy AI systems and secure collaborative machine learning environments.
- Reviewed more than 30 recent research papers on AI security, AGI safety, cyber defense, and privacy-preserving intelligent computing methodologies.
- Prepared technical reports, literature reviews, and experimental analyses supporting faculty-led cybersecurity research and AI security investigations.
- Collaborated with faculty researchers to investigate cybersecurity challenges affecting AI-enabled systems, Wireless IoT networks, and intelligent computing environments.

PROJECTS

- AI-Powered Network Vulnerability Scanner** ([GitHub](#))
- Developed a Python vulnerability scanner using Nmap to identify 100+ exposed network services.
 - Automated CVE-based vulnerability assessment, reducing manual security analysis effort by nearly 70%.
 - Implemented host discovery, service fingerprinting, and operating system detection for network assessment.
 - Generated structured security reports containing vulnerability severity and recommended remediation actions automatically.
- Secure Face Recognition Attendance System with Liveness Detection** ([GitHub](#)) ([Live Demo](#))
- Developed a biometric authentication system using Python and OpenCV for secure attendance verification.
 - Implemented blink-based liveness detection, preventing spoofing attacks and improving authentication reliability by 95%.
 - Designed secure attendance storage supporting biometric verification and role-based administrative access control.
 - Built analytics dashboards managing over 500 attendance records through secure reporting mechanisms.
- Network Traffic Analyzer and Packet Inspection Tool** ([GitHub](#))
- Developed a Python packet analyzer using Scapy for real-time network traffic inspection.
 - Captured over 10,000 packets supporting anomaly detection through automated traffic inspection techniques.
 - Implemented protocol classification, packet filtering, and traffic statistics supporting network security monitoring.
 - Generated automated traffic reports reducing manual packet inspection effort by approximately 60%.
- JPMorgan Transaction Processing Microservice** ([GitHub](#))
- Built a Spring Boot microservice processing over 100,000 financial transactions using Apache Kafka.
 - Implemented secure REST APIs supporting transaction validation and persistent SQL database storage efficiently.
 - Integrated external REST services improving backend scalability and financial transaction processing performance significantly.
 - Applied clean architecture principles for secure, scalable, and maintainable enterprise backend application development.
- Secure AI Automation Platform** ([GitHub](#))
- Developed Python automation workflows integrating AI services, CRM platforms, and secure REST APIs.
 - Reduced manual lead processing effort by over 80% through intelligent workflow automation techniques.
 - Implemented authentication mechanisms protecting sensitive business information during automated API communication processes.
 - Designed scalable automation pipelines supporting secure validation, monitoring, and third-party system integrations.

EDUCATION

Jamia Hamdard (Deemed University, NAAC A+)	2023 – 2026
<i>B.Tech in Computer Science and Engineering (Lateral Entry)</i>	CGPA: 7.5 / 10
Jamia Millia Islamia, (JMI Polytechnic)	2020 – 2023
<i>Diploma in Computer Science Engineering</i>	CGPA: 7.6 / 10
Jamia Senior Secondary School	2019
<i>Class X</i>	GRADE A

CORE TECHNICAL SKILLS

Cybersecurity : Network Security, Information Security, Vulnerability Assessment, Threat Modeling, Risk Assessment, Identity & Access Management (IAM), Role-Based Access Control (RBAC), Secure Software Development, Authentication, Authorization, Security Monitoring, Incident Response, OWASP Top 10, Cryptography Fundamentals, Secure API Security

Networking : TCP/IP, OSI Model, IPv4, IPv6, Subnetting, Routing & Switching, DNS, DHCP, HTTP/HTTPS, VPN, Wireless Networks, Cisco Packet Tracer, Network Troubleshooting

Programming : Python, Java, SQL, C++, C, Object-Oriented Programming (OOP), Data Structures & Algorithms, REST APIs, JSON

Security Tools : Linux, Wireshark, Nmap, Burp Suite, Metasploit (Learning), OpenSSL, Git, GitHub, Docker, Postman, VS Code

AI for Cybersecurity : Machine Learning, Federated Learning, Computer Vision, OpenCV, Large Language Models (LLMs), Agentic AI, Prompt Engineering, OpenAI API, LangChain

Cloud & Databases : Google Cloud Platform (GCP), AWS (Basics), ChromaDB, Pinecone, MySQL, H2 Database

Soft Skills : Analytical Thinking, Problem Solving, Research, Technical Documentation, Communication, Team Collaboration
